## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Stolfa et al. (U.S. Patent No. 5,965,912).

In re claim 1, Stolfa (esp. Fig. 2) discloses a semiconductor integrated circuit device, comprising:

a substrate (12);

MOS transistors which are disposed in said substrate and which include gate insulating films (52, 54, 56, 58); and

an MOS type varactor element which is disposed in said substrate and which includes a gate insulating film, the thickness thereof being thinner than the thinnest gate insulating film among said gate insulating films of said MOS transistors (column 4, lines 12-14).

In re claim 2, Stolfa discloses the device of claim 1, wherein the varying of gate voltages is contemplated in order to vary the capacitance of the various devices (column 3, lines 52-55) a maximum gate voltage applied ... transistors" is a recitation of the intended use of the claimed device. Terms that simply set forth the intended use, a

property inherent in or a function, do not differentiate the claimed composition of these elements from those known to prior art.

In re claim 2, Stolfa discloses the device of claim 1, wherein a maximum gate voltage applied to said MOS type varactor element is lower than a maximum gate voltage applied to said MOS transistors (column 5, lines 50-55).

In re claim 3, Stolfa discloses the device of claim 1, wherein said substrate is a semiconductor substrate (column 1, line 47).

In re claim 4, Stolfa discloses the device of claim 2, wherein said substrate is a semiconductor substrate (column 1, line 47).
